Grommet flags are versatile enough to attach to a load with bungees, rope or Flag-Mags.

GROMMET FLAGS

Grommet flags are double-stitched, with a reinforced hem and two large #5 toothed grommets. Choose from poly/cotton twill, mesh, polyester and jersey knit. Depending on your state requirements, flags are available in 12", 16", 18", and 24" Red and Flo-Orange.

Great for attaching to machinery or trailers with our top selling Flag-Mags.

WIRE LOOP FLAGS

All wire flags have heavy 10-gauge steel wire with 1/2" loops. 16" and 18" flags have plastic sleeves over wire to protect the shoulder of the flag. Each flag is double-stitched with reinforced hem. Attaches with our Flag-Mag or Flag Straps (see page 7 & 10).

## ROUND BASE MAGNETS

Standard round base magnet assemblies are made with ceramic magnets in steel base cups. They are magnetized together with the casings to create a holding force that is up to 32 times stronger than an individual ceramic magnet.

Neodymium rare earth magnets are extremely powerful and are nickel plated with a protective cover.

P/N	DIA	HOLE	DESCRIPTION

RB90	4.90"	0.500"	210 LB ROUND BASE MAGNET

\*Ratings based on Manufacturer's data

Pull strength is measured on a flat 0.50" thick steel plate. Use caution when handling our magnets. Their exceptional magnetic force will attract to metal and each other, don't get pinched.

## Common Applications

Antenna mounts • Work lamp bases • Emergency light holders • Vehicle flag holders • Sign and banner holders

### VINYL BANNERS

Our Vinyl Banners are exceptionally strong and durable. Printed on 13 oz. vinyl-laminated polyester, they are tear and fray resistant. Fitted with large #5 toothed grommets or heavy 3/8" bungee cords. Grommets have a 9/16" center hole and are set with 90 lbs of pressure. Bungees are 18" with coated steel hooks. Our 18"x 84" banners exceed AASHTO requirements for all 50 states. All banners are double-stitched.

"The product holds up well. I fly the signs most of the ride and can get 6 months of use out of one banner!"  
~Ed - Boise, ID

"We use SafeTruck products on our oversize loads because of the durability. They last much longer than any other flags or banners that we have used in the past! The color holds much better as well."  
~William - Barto, PA

### MESH BANNERS

Our mesh banners are made of 9 oz. vinyl-coated polyester that allow up to 30% airflow for less wind resistance. All mesh banners are double-stitched with edge binding top and bottom.

"I recommend SafeTruck Aluminum Signs to anyone!  
ALL of my safety products are ST/MS. Carita - and as far as I'm concerned it is going to stay that way.  
I've used other products and your products out last them all!"  
~Paul - Cheyenne, WY

## WOOD SIGNS

Our wood signs are made from premium quality 3/8" DMDO (double medium density overlay). We seal the edges and prime the surface before coating with enamel. After printing they are top-coated to ensure a long service life.

"SafeTruck Wood Signs are easy to purchase, not too expensive, very durable, and the color seems to last a long time. SafeTruck's customer service is excellent as are the vendors I work with."

Ms.Carita SafeTruck has been the industry leader in OVERSIZE products for the Heavy Haul Industry. When it comes to Over Dimensional banners or signs and Safety Flags too, we have the best quality in the business. We also have the widest variety of products to choose from for a specific application or region. Our skilled technicians use only the best materials and can also build customized products for those hard to fit applications. That’s what we do.

There are many companies that have tried to copy our products none have been able to compete. Oh they might make one or two items but their quality pales in comparison. We set the industry standard forty five years ago and no other line has even come close.

Below are just a few quick comparisons. Please visit our website for more comparisons that separate us from them.

Thicker edge binding, always double stitched, and heavy duty grommets.

	Safetruck by Ms. Carita	Competitor #1
GROMMETS	#5 toothed, set with 90-lbs of pressure through two layers of material	#3 toothed, set through a single layer of material
STICHING	Reinforced Double stitching	Single stitching
MAGNETS	Epoxy filled for stronger product	No epoxy filling, allows magnets to crack and fall out
MESH MATERIAL	12 yarns per SQ/IN 30% stronger material Visible in all lighting conditions	9 yarns per SQ/IN Difficult to see in many conditions
INK	High quality printing on banners Does not bleed through	Poor print quality Bleeds through
BUNGEEES	Heavy duty 3/8" bungees	Low quality 1/4" bungee
STAFF FLAGS	Sewn pole pockets for a better, stronger flag	Material rolled around staff & stapled, high chance of failure

### 5-PANEL DUO-FLIP PLACARD

The duo-flip system features 5 placard panels in a single frame. Placards meet D.O.T. specifications for transporting hazardous materials in bulk. The frames are constructed of corrosion resistant, fully formed rigid aluminum. Placard panels are made of aluminum alloy and mill roller coated with white acrylic paint baked at 400°. Panels lock in place with four stainless steel pressure fasteners. The numerals flip easily to give you any combination of 4-digit numbers. This system is available in brite mill finish.

The system includes:

- Corrosive 8
- Flammable 3
- Poison 6
- Combustible 3
- Blank Panel

### 8-PANEL STANDARD FLIP PLACARD

This Heavy Duty Flip System includes 8 placard panels in a single frame. Placards meet D.O.T. specifications for transporting hazardous materials. The frames are constructed of corrosion resistant, fully formed rigid aluminum. Placard panels are made of aluminum alloy and mill roller coated with white acrylic paint baked at 400°. Panels lock in place with four stainless steel pressure fasteners. Available in brite mill aluminum finish or white.

The system includes:

- Poison 6
- Non-Flammable Gas 2
- Oxidizer 5.1
- Dangerous
- Flammable 3
- Flammable Gas 2
- Corrosive 8

- Compact and easy to carry
- Built tough to last longer
- Made in the U.S.A.

P/N: MST115

#### TANDEM AXLE STOP

The Tandem Axle Stop is designed specifically for adjusting your tandem axles. The Tandem Axle Stop fits both old and new suspension types so it’s ideal for the fleet driver who pulls a different trailer regularly. The double ends also act as a counter balance to keep it firmly in place while sliding the frame to the desired location.

P/N: MST110

- **START** getting it right the first time, every time.
- **START** adjusting your tandems without a spotter.
- **STOP** guessing where to stop while adjusting your tandems at the scales or for tight curvy roads.
- **STOP** climbing in and out of your rig multiple times for each adjustment.
- **FITS** both 1.5” and 1.75” frame holes.

#### How it works:

1. Release and latch the tandem retaining pin lever.
2. Place the Tandem Axle Stop in the hole next to where you want the tandem retainer pins to catch.
3. Lock your trailer brakes.
4. Pull forward or reverse until the tandems hit the Tandem Axle Stop.
5. Ease pressure off the Tandem Axle Stop just a little so it is easier to remove.
6. Unlatch and reset the tandem retaining pin lever, locking-in the pins.
7. Remove the Tandem Axle Stop and go.
